Cleaning and maintenance must not be completed by children without supervision.
- If the supply cord is damaged, it must be replaced by the manufacturer or a qualified electrician.
- This product can become very hot and cause burns. Particular attention must be given whenever children and vulnerable people are present.
- Never position the heater beneath a plug socket.
- Never operate the heater within the vicinity of curtains or other combustible materials.
- Do not use this heater with a programmer, timer, separate remote control system, or any other device that switches the heater on automatically.
- Do not use this heater in the immediate surroundings of a bath, shower or swimming pool.

Brief Introduction

This heater is an IP65 rated remote operated infrared heater. it has almost an unlimited amount of outdoor uses, like smoking areas, courtyards, gardens etc. This patio heater is energy efficient, convenient and environmentally friendly.

Please read this manual before operating the heater.

Warning

Never store or use any flammable vapours or liquids in the vicinity of a heater. Remove the black styrofoam inserts from the heating elements before powering the heater on. Failure to do so may cause damage and may cause a fire.

Important Safety Instructions

When using electrical appliances, always follow basic safety precautions to reduce the risk of fire, electric shock or injury. Read all the following instructions before using this heater:

- This heater is hot when in use. To avoid burns, do not touch it with bare skin while in use. Keep combustible materials, such as furniture, pillows, bedding, paper, clothes and curtains at least 0.9m away from the heater.

- Take extreme caution when the heater is left powered on unattended and whenever using the heater in the presence of children or vulnerable people.
- Always unplug the heater when not in use.
- Do not run the cord under any carpeting. Do not cover the cord with throw rugs, runners or similar coverings. Do not leave the cord under any furniture or appliances. Position the cord away from busy areas to prevent tripping over.
- Only plug the heater into properly grounded outlets.
- To disconnect the heater, turn the socket off before removing the plug.
- Do not block any ventilation. Do not use on soft surfaces, like a bed, where openings may become blocked, this may cause a fire, an electric shock or damage.
- Do not insert or allow foreign objects to enter any ventilation or exhaust openings.
- Do not place any naked flame sources (lit candles etc.) on the heater.
- Do not use the heater in areas where gasoline, paint, or flammable liquids are present.
- Only use the heater as established here. Actions not recommended may result in fire, electric shock or injury.
- Always plug the heater into a wall outlet/receptacle directly. Never use an extension cord or relocatable power tap (outlet/power strip.)
- Check if the voltage indicated on the nameplate corresponds with the local mains voltage before connecting the heater.
- The heater must never be placed directly below a mains socket.
- The casing and the front cover of the appliance become extremely hot during operation. Ensure that no combustible materials cover or obstruct the heater, whether due to wind or any other influences (such as curtains, marquees, flags, plastic foil etc.)
- In the event of improper use, there is a risk of electrical shock and/or a fire hazard. Turn the heater off immediately. Do not try to repair the heater by yourself. Please contact a suitably qualified electrician.
- Unplug the heater from the socket and wait until it has cooled suitably before cleaning.

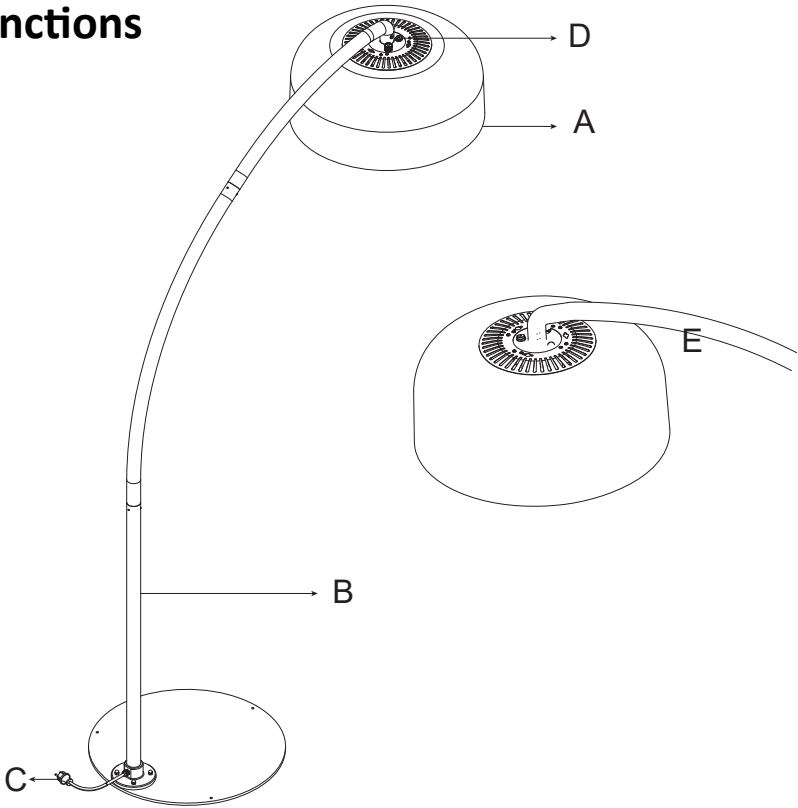

Covering the heater is strictly prohibited.

Specifications

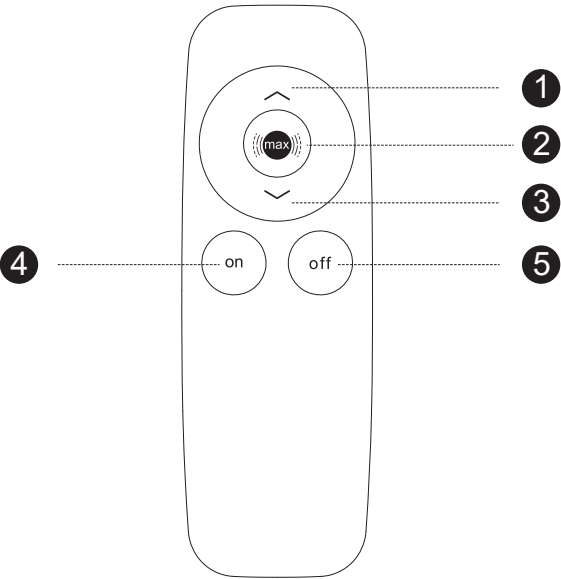

Name	Solstice
Voltage (V)	220-240Vj 50/60Hz
Power (W)	2500W
IP Rating	IP65

Functions

	Name	Function
A	Heating Module	Heating
B	Heater Stand	Holds the heating module firmly in place
C	Plug	Connects the heater to power
D	Switch	Turns the heater On/Off
E	Reset Button	1. While turned on, hold the reset button for 5 seconds to reset the bluetooth connection. 2. While turned off, hold down the reset button for 5 seconds to re-calibrate the controller to the heater.

Remote Control Instructions

Button	Feature
1 Up Arrow	Increases the heat output by one level
2 Max	The maximum heat output
3 Down Arrow	Decreases the heat output by one level
4 On	Turns the heater on at 33% power. After 4 seconds, it will automatically switch to the most recent temperature setting. When turned on for the first time, it will default to 100% power after 4 seconds.
5 Off	To switch the heater off: Press the off button. The heater will switch to standby mode (the receiver indicator will light up).

Introduction

- The controller takes 2 AAA 1.5V batteries. Remove the batteries when not using the heater for an extended period of time.

Operation Instructions

- Remove all packaging and remove all parts. Check all parts for damage.
- Connect the poles highlighted in **Figure 1** and fit them together with the screws provided.
- Connect the poles highlighted in **Figure 2** and tighten these together.
- Connect the poles to the base as shown in **Figure 3**.
- Fix the base to the ground with expansion screws as shown in **Figure 4**.
- Connect the heating element to the assembled stand, as shown in **Figure 5**.
- Turn on the power to operate the heater.

- Ensure the heater is installed in a suitable location and that all fixings are stable enough for long-term use.
- Ensure the heater is not exposed to excessive winds.
- Check all fixings regularly. Weathering could cause them to loosen.
- Turn the heater on for 15 minutes to ensure it is working as intended.
- Unplug the heater when not in use for an extended period.
